

Make CDR
your competitive
advantage

Data Holder as a Service [HaaS] Data sheet — Energy

HaaS at a glance

BIZA's Data Holder as a Service (HaaS) helps data holders meet their CDR obligations with a comprehensive, cost-effective and extensive solution.

As the only pure-play CDR vendor, BIZA's focus and commitment to the CDR from the very beginning has given our customers a competitive edge in their market segment.

Full CDR API Implementation

- Account & Transaction Information
- Customer Data
- AEMO integration
- Service Metrics & Admin APIs

Enterprise integration

- ACCC Registry
- Transaction Data Systems
- Customer Authentication
- SIEM and reporting

"As A Service" Solution

- Highly available cloud-hosted service deployed in AWS Sydney
- No customer data stored in the Biza platform
- No data leaves Australia
- ISO27001 certified

Complete InfoSec Support

- FAPI 1.0
- CDR-specific modifications
- Fine-grained consent with end user consent dashboard

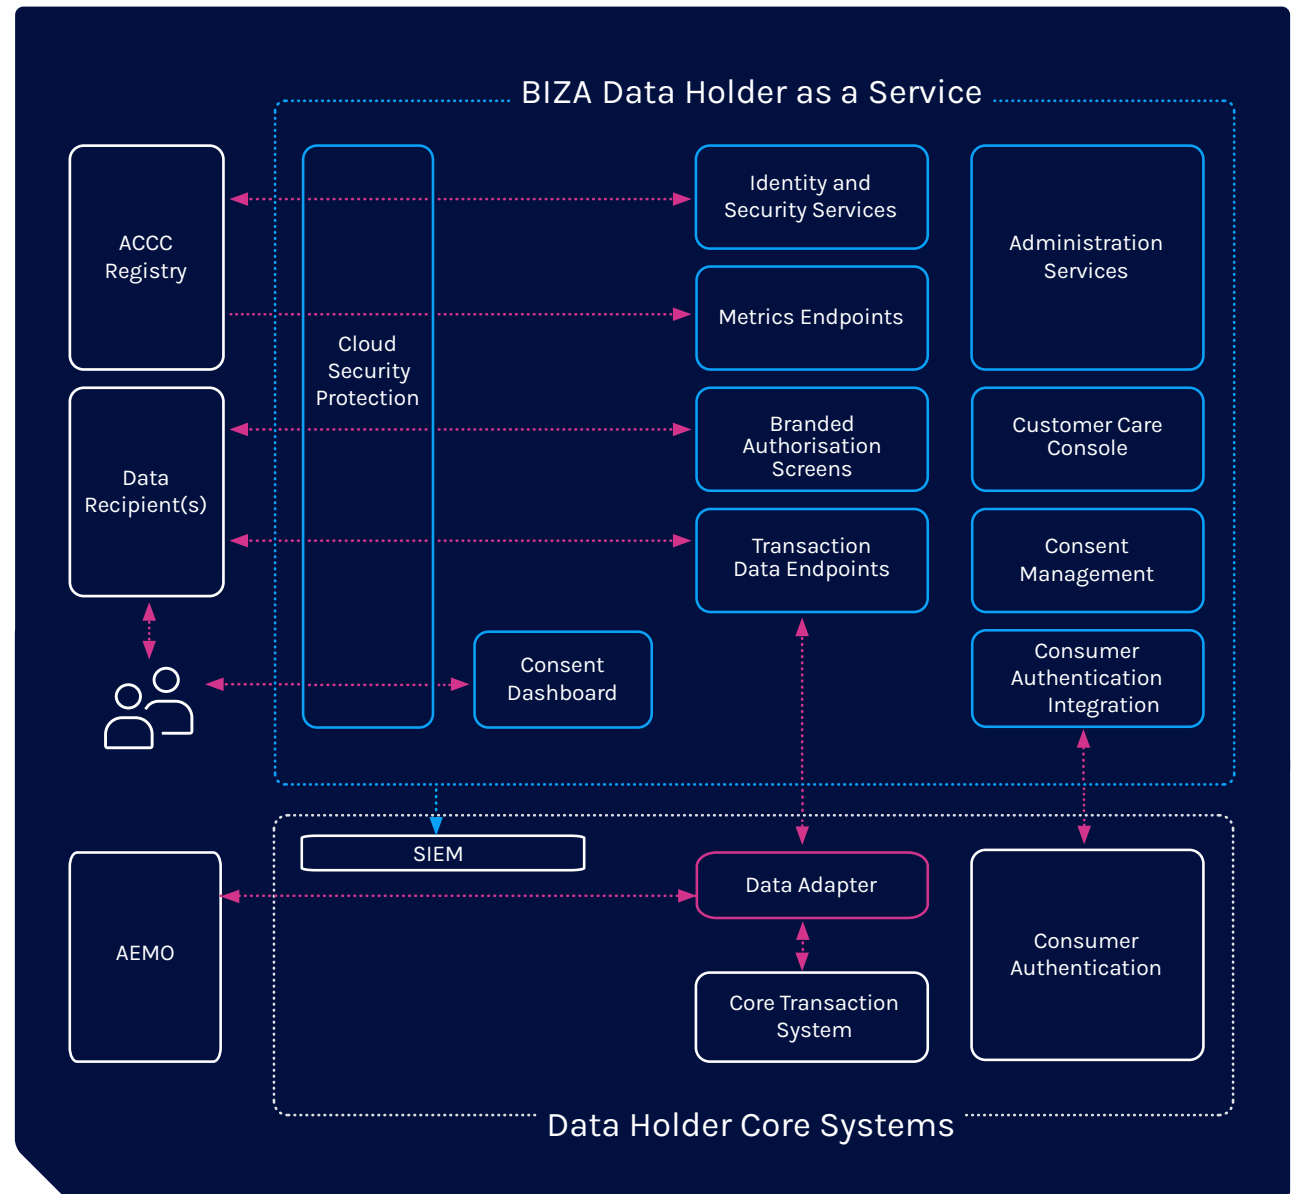

Realise your CDR investment faster

Go beyond compliance with Biza's modern API-driven, open standards-based platform. Full support of the financial-grade API (FAPI) gives Biza customers a secure baseline for deploying new applications and integrating with existing consumer services.

Biza's solution provides a flexible consent model that goes beyond the CDR, allowing for rich authorisations to be defined and used in non-CDR channels.

As the CDR introduces new functionality, like action initiation, the Biza platform will adapt to keep our customers at the forefront, via the industry's most comprehensive solution, developed by the leader in CDR.

We can future-proof your offering as CDR evolves

Be the first to take advantage of new CDR enhancements. Deliver new customer services on a modern, secure platform and profit from BIZA's singular focus on open data. Leading in the CDR, we help you accelerate your digital transformation.

Beyond energy services

Go beyond energy propositions. Help your customers get more out of their data and achieve the lifestyle outcomes that matter to them.

Improve customer loyalty and satisfaction with modern, consent-driven apps and services.

Expanding data sets

CDR will be a cross-sector, economy-wide data sharing ecosystem.

Position your offering to maximise the opportunities that come with this via the same Biza platform.

A trusted partner

Knowledge is power. We've been here from day one: the standards, the rules, the direction of the ecosystem. Leverage our knowledge to work for you.
